

### Gangloff Industries, Inc. Trailer Sanitation Policy

To our customers, who entrust us with the care of their products, Gangloff Industries, Inc. submits the following information relative to the steps which we take to provide trailer sanitation:

#### **Carrier Trailer Sanitation Policy:**

- The interiors of Gangloff Industries, Inc. refrigerated trailers are lined with materials compatible with the transportation of both raw and processed food products, and allow for ease of cleaning and sanitation.
- Gangloff Industries, Inc. does not carry hazardous materials, garbage, or waste of any kind.
- All trailer interiors are thoroughly cleaned and sanitized during the performance of regular maintenance when at our home terminal location in Logansport, IN. Trailers are also inspected for any damage to trailer linings or door seals which could harbor or allow the infiltration of insects, or compromise the ability of the refrigeration unit to maintain a consistent temperature within the trailer. All defects are repaired before the trailer is allowed to return to service.
- Gangloff Industries, Inc. maintains a National Account with Blue Beacon Truck Washes, Trailers are washed on the road according to the following procedures.
  1. Cold water washout when there is dry material on the walls or floor that cannot be swept from the trailer by the driver.
  2. Hot water wash with soap when there is blood or other meat residue present or the trailer has a noticeable of objectionable odor.
- All loads must be sealed as a means of insuring sanitary conditions inside the trailer are not compromised during transit. If a load is not sealed via shipper's seal driver must seal it with a provided Gangloff Industries, Inc. seal. Refer to the Gangloff Industries, Inc. Transportation Load Security Policy.
- Each Driver is briefed regarding this policy during the new driver orientation process

#### **Driver Responsibilities:**

- Inspect the interior of each trailer after unloading or when picking up an empty drop trailer and communicate with dispatch any discrepancies with the interior of the trailer.
- Follow the dispatcher's instructions for having the trailer washed out, if necessary, prior to picking up the next load.

Proper Sanitation is a critical food safety issue. Failure to comply with this policy would be a violation of company policy and procedure and could result in a driver's responsibility of cargo loss or claim.
